## High-tech products for your passion

There's nothing in the world to compare with a SPORTEX rod. It owes its legendary reputation to the power of innovation and the unique technology which for decades has set standards worldwide. Today, our rods are a byword for reliability and master craftsmanship.

Our rods are symbols of quality and long service, attributes which are becoming ever more important in these days of fast-paced living. It is with pride that we can say that SPORTEX rods have excited generations of anglers with their reliability in demanding situations and their incredibly long life. Sustained research with new materials and material combinations are the bedrock. No other rod manufacturer can take advantage of such a wide range of materials for rod production.

**Every SPORTEX rod is the result of long years of practical experience and innovative technical know-how.** Our technical knowledge has grown over the decades. In the Fifties, we were renowned for the honey-coloured fibreglass blanks which set countless records in casting distance and precision. And when innovative carbon fibre materials arrived, we were among the first to recognise their potential for making rods, and put them to use. Thanks to our own SPORTEX HT-Cross Winding blank technology, our rods are unique in their combination of strength, lightness and speed.

### **We stand by our products – and that's guaranteed!**

Our quality control procedures meet the highest possible demands, whether it is the selection of the material and components specific to the rod, the painstaking checking during the manufacturing process of the blanks or the ongoing inspections at the rod make-up stage. Every SPORTEX rod is an exquisitely crafted quality product. And we, the manufacturers, stand by that with our **10-year blank guarantee\***.

\*Add-on parts such as rings and reel holders are covered by the statutory 2-year guarantee

## What makes SPORTEX rods so unique?

**They are not simply uniform rods 'off the peg'.** Every rod is an individual creation, even within the same series, adjusted in length, action and component composition to suit the particular casting weight, distance and anticipated twist.

### **For rods without compromise only components without compromise will suffice**

Anyone who wants to be a world leader when it comes to making rods cannot allow for compromise. This means that SPORTEX rods are made with the best components in their class, such as original FUJI rings and the latest generation of FUJI reel holders, natural cork of premium class AAA, and wear-resistant Duplon of the highest grade. A special lacquer paint is used for the partial or total coating of the rods, which is elastic and impact resistant, providing protection for years to come as well as a strikingly good appearance.

## SPORTEX *HT-Cross-Winding*

At the heart of every agile SPORTEX fishing rod are the right fibres and the innovative processing under which they go.

We use only the latest and highest quality carbon fibres for our rods, sourced from the leading manufacturers. What makes our knowledge and skills so special is how we achieve the specific mixture of the most varied materials, such as highly modulated carbon fibres, Kevlar, boron or zylon, and merge them into a frictional force-closed combination. This enables us to exploit the advantages of the individual fibre materials, such as flexural strength and tensile strength, lightness, impact resistance, speed and resistance to breakage in optimum combinations. And the result? Rods tailored individually to specific types of fishing and angling techniques, with the fast action typical of SPORTEX; qualities which inspire champion anglers all over the world.

### **The innovative difference with SPORTEX!**

We adopt our own approach when it comes to laying the carbon fibres. Instead of the conventional simple and economical helical laying of carbon fibre mats on the core of the rod, with our SPORTEX-HT-Cross Winding technology the carbon fibre mixture is positioned in a single direction on the rod core, i.e. parallel to the axis of the rod. This gives our rods more strength, more stability and more speed. And all this with a lighter blank with a thinner diameter.

In addition, with our *HT-Cross Winding* technology, the fibre composite with high modular carbon fibre bands, which, depending on the type of rod, may already be integrated into the uppermost carbon fibre layer, are wound around crossways, then gently heated stage by stage, and undergo perfect fusion. This painstaking curing of the blanks ensures a consistently high action performance even under the toughest conditions.

**10 YEAR  
BLANK GUARANTEE**

# The aim is everything – SPORTEX spinning rods

Putting the bait precisely where the fish is. Or where you think it is. Or close to it, or well away. And with as little effort as possible, for hours at a time. Direct contact with the bait to give it that sense of 'life' which stirs things up and sets them in motion. Signalling every fish contact immediately and playing every catch perfectly when it runs.

Our spinner rods are programmed to meet these requirements exactly. Every rod in our range is designed without any compromise to catch zander, pike, bass, perch or trout, and provides 100% support for traditional and modern methods alike.

**Only the best for the best!**

**Expert advice:**  
Very often, an angler relies on the lure that caught the last fish. But all too soon, he gets frustrated – there's no reaction and no bite. But, the proof of the pudding is in the eating. Stay at the same spot, but change your lures and try different colours. Just be sure to leave time between the changes.

# SPORTEX TiBORON Spinning rods

## No Limit – high-end spinning rods in the superlative

With this rod series, SPORTEX has realised the vision of every spin fisherman. The unique combination of materials made from HM/IM carbon fibres and Boron\* makes for a dream combination of lightness and resilience, paired with unbelievable reserve of power.

With this rod series we put into the hands of spin fishermen ultra fast and powerful rods, which in function and design belong to the best on the market.

The slender blanks finished to the highest level of craftsmanship have a timeless high-quality design, red burl wood appliqué on the handle, machined designed metal end caps as well as high-quality Fuji SIC guides with high heat dissipation and exclusively designed reel seats, which all makes up these high-performance rods. The special attraction for spin fishermen! Through the integrated weight in the handle every rod is perfectly balanced.

It sits like a feather in your hand.

**Design formats:**  
2-part, length 210 - 305 cm

**Casting weights:**  
20 - 80 grammes

## CARBON FIBRE & BORON

**The perfect symbiosis of lightness and power.**

The unique combination of materials made from HM/IM CARBON FIBRES and BORON makes for a dream combination of lightness and resilience, paired with unbelievable reserve of power.

The result: rods made for generations and indomitable in its class.

# Carat Z Spinnung rods

## New generation high-end spinning rods containing Zylon

At SPORTEX, rod building means a constant search for new innovative materials. The Carat Z is the first of a new generation of rods manufactured from a composite of high modular carbon fibres and ZYLON, creating a new dimension in fishing rods. This combination of materials not only maintains the rigidity, lightness and speed that is expected of a carbon blank, but combines these characteristics with the tensile strength and power that is typical of Zylon. The result is a fast-action spinning rod with a slim, light blank that is practically indestructible. Our extensive quality requirements regarding materials, components and workmanship are once again clearly evident. Modern, elegant design and the perfected counter-balance system from the TiBoron models accomplish this rod series. Authentic innovations that result in tangible advantages for the angler brought together SPORTEX craftsmanship – that's what SPORTEX Carat Z stands for.

### SPORTEX CARAT Z

Whether using the lightest of spinners for trout and perch or heavy shads for big pike, you will find the perfect rod for every application.

**Design formats:**  
length 210 - 330 cm

**Casting weight:**  
12 - 110 grammes

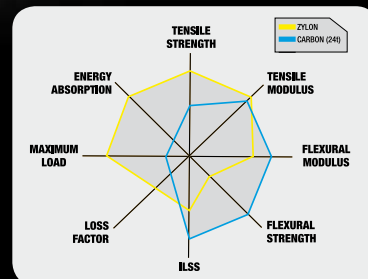

10 YEAR

### SPORTEX CARAT Z SEATROUT

Specialist rods for extreme distances and exact casts even at a strong breeze. Sensitive tip with a powerful backbone for Snaps and Co. High resilience of the blank and perfectly balanced rear handle for optimal power transmission and fatigue-proof fishing.

These exceptional rods are available in 3.05 m as well as 3.35 m with a casting weight of 28 g.

### SPORTEX CARAT Z – 5-section

**One for all – the perfect travelling rod**

These short-sectioned travelling rods are your universal travelling companions. And here's the special feature: the rod can be used to fish in two lengths; 2.40 m with four sections, and 3.00 m with five sections. And that's without any compromise when it comes to action and deployment of power. With these rods you can tackle any situation with ease, whether fishing on holiday or at home. The carbon fibre/zylon blank provides all the safety and reliability you need, even with something special on the hook. This is a really well conceived rod, the rod of your dreams to rank alongside any top quality multi-section creation.

**Design formats:**  
5/4-sections, lengths 300/240 cm

**Casting weights:**  
40 and 65 g

## CARBON FIBRE & ZYLON

**The high-tech fibre combination for top sports performance, safety and reliability**

With its innovative mix of HM carbon fibre and zylon fibres, which boast extremely high tear resistance and high elasticity, our *HT-Cross Winding* technology allows us to produce blanks which are unique in lightness, speed, power, and 'unbreakability' for a new generation of spinning rods.

ZYLON + CARBON

# SPORTEX INSTINCT Predator rods

INSTINCT – not only a name...

What gives a successful angler the edge over others? It's his natural instinct for the perfect timing, choosing the best swim and for using the right bait. To optimise these skills of exceptional anglers and to complement their phenomenal spirit we have created a tailor-made rod series which can not be topped in perfection. Featuring highest standard carbon material and the 'Sportex-like' perfect, classy finish these rods will inspire your instinct and make your fishing more versatile and more successful.

The INSTINCT-series features 16 individual rods from 7 ft up to 10 ft (210 cm to 305 cm) and test curves from 15 g to 150 g (1/2 oz. to 5 oz.).

New **FUJI** reel seat for excellent, throughout rod action.

10 YEAR  
BLANK GUARANTEE

## CARBON FIBRE & KEVLAR

### The power combination

A material mix for real lovers and connoisseurs of the qualities of Kevlar. Highly modulated carbon fibre stands for lightness and strength. Kevlar stands for even more strength, high impact resistance and excellent tensile strength capacities. These fast but tough rods are forgiving of errors during twist, and provide the safety and reliability needed from the little perch to the catfish

# SPORTEX KEVLAR Spinning rods

## The power combination made from Kevlar and carbon for even more strength and reliability

These high-quality, almost unbreakable rods have been synonymous for years with lightness, stability and strength. Thanks to over 30 years of experience in the building of Kevlar rods, with this rod series we were able to optimally combine the lightness and breaking strength of Kevlar with the resilience and rigidity of carbon fibres. This material mix is made up of 50% Kevlar and 50% high-quality HM carbon fibres and makes for extremely light blanks with a strong spine. The organic action curve from the butt to the tip provides accurate casting and controlled playing with the fish, both close at hand and further away. The special feature of this rod series is the extreme conductivity of movement impulses. Its fittings with the finest cork, Fuji SIC guides as well as Fuji reel seats make this rod a highlight for every set of angling equipment. All SPORTEX KEV rods feature the new, innovative SPORTEX Balance System S-B-S – integrated in the screwable end cap. Perfectly balanced dream rods, especially designed for intensive casting

### KEV SPIN / SPIN Light

With a casting weight of 16 to 60 grammes and lengths of 240 cm to 300 cm these elegant, slender rods are suitable for every type of angling for predatory fish. In short lengths they are ideal for angling from a boat or on banks with vegetation, in longer lengths they are perfect for spin fishing from the riverside, e.g. for bass or zander. Due to its exclusive fittings, it is an optical highlight with unique performance. Thanks to the S-B-S System it sits like a feather in the hand.

**Design formats:**  
length 240 - 300 cm  
**Casting weight:**  
15 - 60 g

### KEV Pike

Are you looking for the best rod for spin fishing for pike? These are the absolute specialists which come in 2 lengths. The perfectly balanced blanks have a strong, flexible spine with an active tip which reports each bite instantly and sets the hook in a flash. Due to their typical action for SPORTEX Kevlar, they can cast light to heavy soft baits, as well as heavy spoons and lures. These rods are also ideally suited to troll for pike. The S-B-S System makes for a tireless day of angling. You will feel the difference.

**Design formats:**  
length 275 and 300 cm  
**Casting weight:**  
80 g

### KEV Sea Spin

Created for heavy predator fish and light pilk angling with lengths of 270 cm and 300 cm and a casting weight of 100 grammes, they are perfect for the hunt for large pike, cod and large salmon. Whether for light pilk fishing in the Baltic Sea or angling for predatory fish with heavy bait at the bottom, the Kev Spin is your choice. Thanks to the SPORTEX Balance System S-B-S it sits like a feather in your hand.

**Design formats:**  
length 275 and 300 cm  
**Casting weight:**  
100 g

## Your link to the world below

### Just feel it...

The ultimate challenge is catching pike, zander, and perch using the most modern methods. Direct contact with the bait, perfect feeling and the really hard twist... you can experience it all with the Styx. Nothing comes between you and the bait. Styx rods are ultra-light and have the kind of action you've dreamed about. The design is simply coolness itself. These really special 'sticks' are inspired by the concept of Street Fishing.

Less is often more, and this was the guiding principle behind this new concept. A couple of lures, a few accessories in your pocket, an exceptional rod in your hand, and you're ready. Whether it's the canal, the inland harbour, or in the town itself – Purity is the name of the game.

#### Styx V

Are you looking for the perfect contact to the "underground"? Are you able to offer your Vertical-bait with an ultra-light rod? The STYX V offers you the ultimate tool for direct lure control. Available as one spinning and one casting version. Perfect length: 1.88 m Perfectly casts: 30 g

#### Styx B

Catch seabass with the STYX Bass and you won't stop dreaming of anything but this rod. Whoever is in slave of these aggressive sea-predators, does not get away from it. The STYX B stands by your side and doesn't let you down. Try this excellent rod on zander and you will find out it is just as good. Get your matching rod in two length and casting weights of 40 g.

#### Styx T

Leightweight – direct – perfect feeling. Three synonyms for a Twitch rod. With regards to Length, action curve and fastness, the Styx T is made for playing hard and soft lures. Just like a Stradivari for professional musicians, the Styx T is the non-plus-ultra when it is about playing with the lures. Just like the Vertical – the Twitch is available in spinning and casting design. Perfect Length: 2.20 m Perfectly casts: 105 g

# SPORTEX OPAL Predator rods

## Innovative rods for ingenious angling – less material and less weight for increased dynamics

These brand new Opal rods received a lot more than just a face-lift. Using a brand new resin and surface refinement we managed to reduce the rods weight a lot. This weight reduction is supported by the latest development in Fuji reel-seats improving the rods action and sensitivity especially in the handle section. Contact is much better now and one can perfectly feel and control every movement of the bait. No matter if you're fishing lakes, currents or tricky environments, these rods perform and deliver. Look at them and fish them – there are things one can not describe! Amongst the Opal series you will find Drop-Shot rods, Vertical rods, Jerk rods for light jerking and twitching or a Lure rod for fishing heavy Shads etc.

### OPAL DROP SHOT

The new Drop Shot rods are designed for both fishing situations: the short versions for boat fishing, the long versions for fishing from the bank. The rods are build using the highly sensitive SPORTEX Solid Tip System. The whole construction of these rods, from the S-T-S full carbon tips to the slim, sensitive blank, which transfers even the finest vibration to the bait, is designed for maximum sensitivity in bait presentation. Due to the use of high-quality HM/IM carbon fibre material in *HT-Cross Winding*-Technology, these rods develop their whole power when playing the fish, so even large zander will be landed safely.

Three of the four available models feature full-carbon STS-tips - 205 cm casting 10 g, 235 cm casting 15 g and 305 cm casting 20 g - whereas the fourth model - 270 cm casting 20 g - comes with a stiffer tip section for Drop-Shotting from the shore.

### OPAL JERK

#### The perfect jerk rod for multi- bait caster reels

Every detail of this rod – from the blank with *HT-Cross Winding*-Technology to the Fuji Low-Rider guides and Fuji reel seat – is conceived for jerk bait angling. A continuous stiff action ensures targeted controlled jerking of the bait. These rods are active! They are not just the typical stiff sticks, which slam against the wrists when playing the fish. Thanks to the SPORTEX Balance System S-B-S they sit perfectly balanced in the hand.

This series features three rods with fittings (trigger handle) for baitcasters and multipliers - 168 cm casting 65 g, 203 cm casting 110 g and 192 cm casting 170 g.

SPORTEX Balance System S-B-S with adjustable weight for individual comfort.

Original FUJI Alconite guides with maximum heat dissipation.

10 YEAR  
BLANK GUARANTEE

**S • T • S Solid Tip-System**  
(Drop Shot)  
Unbreakable tip for best bait presentation.

New FUJI reel seat for excellent, throughout rod action.

### Opal Vertical

#### Opal Vertical rods stand for absolute versatility.

They are tailor made for all vertical techniques using small jigheads for Pike, Perch, Bass or Zander. The blank delivers very direct contact but evenly works over its complete length when playing fish. If you aim to chance your position on the lake these rods can also sweeten your day with a nice fish since they do a great job in light Trolling. And if this still is not enough versatility and you spot a fish near the far bank you just take a small Wobbler and cast - these rods playfully perform excellent casting, spinning, vertical jigging and Trolling.

Opal Vertical series features two rods – one is 190 cm long and casts 19 g (Vertikal L) and the second is 200 cm long and casts 30 g (Vertikal M).

### Opal Lure

#### The soft bait rod par excellence!

At last we offer a soft bait rod for angling with a heavy jig head. This rod not only has a perfect stiff action for the best presentation of heavy shads, but – typically for SPORTEX – also full sensitivity when spinning.

The slim blank with *HT-Cross Winding*-Technology with a typically quicker SPORTEX action signals every movement of the bait directly. Perfectly balanced due to the S-B-S System, this rod allows many hours of effortless casting.

**Design formats:** length 270 cm  
**Casting weight:** 65 g

## HM/IM CARBON FIBRE

For our pure carbon rods, we are using a proved and tested mix of high- and intermediate carbon fibres, which are carefully combined to a powerful yet light blank with excellent flexural and tensile strength.

## SPORTEX CARBOFLEX NG- Spinning rods

### NG – The New Generation of modern spinning rods

The Carboflex series, now entering its third generation, is made of 100% HM / IM carbon fibre and is in perfect keeping with the SPORTEX tradition. The rods are semi-parabolic and traditionally have reserves of power right into the rod handle, yet evidently slimmer and lighter than ever. Accurate casting over long periods is simple with these light-weight blanks. Classically, premium quality cork handles and a beautifully engraved butt cap ensure a timeless, elegant finish.

#### Design formats:

length 210 - 315 cm

#### Casting weights:

20 - 120 g

10 YEAR  
BLANK GUARANTEE

# SPORTEX BLACK PEARL Predator rods

## Slim, lightweight and extremely fast

Based on the legendary Black Stream series Sportex have taken the next step in development and presents the brand new BLACK PEARL rods. The unmistakable direct action and speediness of their predecessor has been improved and over all they have become even lighter. To complete the improvements of the blank itself, these rods feature an ergonomically designed handle for increased bait control and a non-slip traction in casting. It's not only the Sportex-quality and distinctive appearance which account for these rods, it is their aggressive character and impressive functionality which makes them a true BLACK PEARL – black and yellow.

The BLACK PEARL-series features 12 individual rods from 7 ft up to 10.5 ft (210 cm to 310 cm) and test curves from 20 g to 80 g (2/3 oz. to 2 2/3 oz.).

10 YEAR  
BLANK GUARANTEE

# SPORTEX Black Arrow / Huchen

## Legendary spinning rod series for big predators

Here we introduce you to speciality models that have been developed for professionals requiring selected rods for certain situations. These classic rods have become an integral part of our sport. They've been favourites amongst top predator anglers for many years, both at sea and on the riverbank.

Black Arrow rods have become a legendary series. Our engineers used these rods as the basis for the Huchen range rods that need to be able to cast heavier weights. Our Huchen Rod also makes an excellent heavy plugging rod when fishing for big pike with large lures, and has larger rings than other rods in the series. For enthusiasts of the modern Twister-angling, we offer the CARAT TWISTER in two length.

### Black Arrow

#### The Legend

The Black Arrow in lengths of 275 to 335 cm with an ideal casting weight of 80g has the SPORTEX-specific semi-parabolic action, which facilitates the sensitive guidance of heavy spoons and twisters. Thanks to the *HT-Cross Winding* technology and the use of high-quality carbon fibre these rods have an extremely fast taper, i.e. the rod does not wind back, so that the bait lands exactly where you want it to. Due to the dynamic power coming all the way down to the butt, you can selectively accelerate the playing of fish, without having to worry that the line will break due to rod overload. These rods are virtually unbreakable even in extreme use in fresh- and saltwater.

### HUCHEN de LUXE

#### The power rod for the king of freshwater fish

Our entire experience over many years in the manufacture of spinning rods has gone into this excellent rod for Taimen (Danube salmon). It only became possible to develop a spinning rod which facilitates tireless casting for hours and sensitive playing with the fish without the risk of their being released, due to our *HT-Cross Winding* blank technology, for which we only use the best, high modular carbon fibres. In the development we specifically attached importance to the combination of the uncompromising spine and a not-too-hard tip. The use of SIC guides from size 40 to 16 as the last guide, effectively prevents the icing, premature breakage and wear on the line. The handle is made from high-quality natural cork of the premium class AAA and is ergonomically fitted for casting and the playing of the fish.

10 YEAR  
BLANK GUARANTEE

Black Arrow – original FUJI SIC guides with high abrasion resistance and maximum heat dissipation

Huchen de Luxe – extra-large 16' flanged tip guide against icing and line abrasion

# SPORTEX SUPER SAFE Rod cases

You want to protect your valuable rods and reels securely from damage! The SPORTEX Super Safe cases are not only practical and roomy, they provide double protection in comparison with other bags. On the one hand by means of a flexible, attached inner shell made of shock-resistant PVC, on the other by means of a waterproof, abrasion-resistant outer surface made of 1.680 D nylon woven fabric.

The fitting with robust, corrosion-protected metal zip fasteners, padded interior sections and padded shoulder straps is typically SPORTEX functional and designed for many years' use. All large bags additionally have a new and easy-to-use rucksack function, that facilitates the transportation of your rods even more. In addition, all of the bags have a practical fitting for hanging up your bags. Each SPORTEX case is an ID for your valuation of your passion.

## SPORTEX SUPER SAFE-Technology for perfect protection of rods and reels

1.680 D non-rip and waterproof nylon fibre layer

Shock-resistant and flexible PVC hard shell

Air-cushioned cellular membrane

Smooth and tear-proof SPX-lining

The large bags have a handy rucksack function, that makes carrying your rods much easier.

**I**  
**Rod bag SUPER SAFE**  
for 1 rigged rod.  
The perfect protection for your rod.  
**NEW** – practical rucksack function

**II**  
**Rod bag SUPER SAFE**  
for 2 rigged rods.  
Elaborate SUPER SAFE rod case with padded inner sections.  
**NEW** – practical rucksack function

**III**  
**Rod bag SUPER SAFE**  
with 3 compartments for 3 rigged or several unrigged rods.  
Outstanding padded lining for total reliability. Padded shoulder strap and high-quality zip fasteners as for all SUPER SAFE models.  
**NEW** – practical rucksack function

**IV**  
**XXL rod bag**  
for 4 rigged or several unrigged rods.  
Three well-lined inner sections.  
A real safe for your valuable rods.  
**NEW** – practical rucksack function

**V**  
**Rod bag with 2 trays**  
for 2-4 rigged rods.  
The SUPER SAFE Multi-talent with 2 trays for ready rigged telescopic or standard rods.  
Long outside bag for net, umbrella, etc... and 2 extra tool bags.  
**NEW** – practical rucksack function

Ihre Ruten sind dank stoßfester PVC-Membrane und besonders dicker Polsterung sicher und geschützt. Dank der praktischen Rucksackfunktion können Sie diese Taschen auch ganz leicht transportieren.  
**NEU** – praktische Rucksackfunktion

shock-resistant  
PVC-membrane

# Carp rods – the strong and the silent

Powerful construction, elegant design and perfect workmanship – these are the standards by which we develop carp rods. Moreover, they provide perfect power deployment when casting and striking. Absolute precision in the placement of the bait, even at the furthest distance, and the shortest possible reaction time at the strike. And absolute reliability at the twist every time, overcoming any surprise attempts to get away. All of this in a perfect package – exactly what you can expect with a carp rod from SPORTEX. Slim, light, and made of the finest components the market has to offer, our carp rods are the non plus ultra in blank technology and functional minimalist design – there's nothing better.

## Expert advice:

### Be flexible...

On the carp scene, the concept of 'roaming' is well established. It's about being flexible and switching between fishing spots. It brings better results than persevering with just one spot. During a session, move between spots once in a while just to find out how alternatives are fishing. The best times to move are early morning and late evening.

# SPORTEX Carp rods

## Innovative carp rods for the ultimate in quality.

SPORTEX carp rods combine understatement in design with optimum action and function in a way no other rods can do. Thanks to top quality high-modular carbon fibres or optimised Kevlar/high-modular carbon fibres in HT-Cross-Winding technology, for decades we have been making the carp rods which people like you have been searching for.

The high quality fittings for our blanks, with the best Fuji components, rings and reel holders, will provide many hours of aesthetic pleasure and great success on the water for years to come. They have been developed by professionals for professionals in carp fishing – people who refuse to accept compromise when it comes to their equipment.

### The new BRILLANT CARP

#### A leader on the world market

There is nothing that cannot be improved. That's even true about our BRILLANT CARP rods, which have been hugely successful for years. Cutting entirely free from the past, we have redesigned this rod completely, taking into account every request from our development team.

Thanks to our new type of high-modular carbon fibres, the new blank has been optimised in diameter, lightness, deployment of power and action. With a diameter of only 12 mm at the handle, this rod is the slimmest on the world market, and all with a weight of less than 300 grammes. Our HT-Cross-Winding technology has made all this possible. Compare your rods with the new BRILLANT CARP, and you'll soon see what progress really can be made in modern rod construction.

**Design formats:**  
length 12', 13'

**Casting weights:**  
2.75, 3, 3.5 lb

### FBC CARP

#### Fisherman's Best Choice

With this aspiration in mind, we developed a rod series that wrote history. Unbeatable when casting, without unnecessary subsequent whipping but in the typical English style, these rods were and still are the benchmark for success and quality. Starting from blank materials, which conform with the latest expertise in carbon manufacturing, to the refined HT-Cross Winding-technology and rod building with only the best and most functional components, these rods still set the benchmarks for the fans of traditional English carp rods.

**Design formats:**  
length 12', 12.5"

**Casting weights:**  
2.75, 3, 3.5 lb

### MORION

#### Slim, fast and light

These are the key factors which were in the fore when developing these new carp rods. The result: a dreamlike high-performance blank with unique performance, sensitivity and reaction ability. Due to the SPORTEX HT-Cross Winding technology it has enormous power reserves when casting and playing the fish. The Morion rods stand for a brand new generation of SPORTEX carp rods. Long-distance and targeted casting is effortlessly possible.

**Design formats:** length 12'  
**Casting weights:** 2.5 lb, 2.75 lb and 3 lb

### MORION STALKER

#### The Movement

These short "stalking-rods" are ideal for catching carp from bank or boat. As in the other Morion carp rods, the blanks are slender and extremely powerful as a result of our HT-Cross Winding process.

**Design formats:**  
length 10', 11'

**Casting weight:**  
2.75 lb

FBC Carp – original FUJI Alconite guides

with high abrasion resistance and maximum heat dissipation

Brilliant Carp – new Anti-Tangle FUJI SIC-guides

10 YEAR  
BLANK GUARANTEE

# SPORTEX Carp rod

With this carp rod we are following entirely new paths to the future of rod construction. For the first time, as with our CARAT Z, we were able to make our innovative material combination of CARBON FIBRE and ZYLON into a reality in the form of a carp rod. This is one of the slimmest carp rods anywhere on the market; and all this with a lightness, agility and strength which could only be achieved by the innovative material mix in combination with our advanced developments in HT-Cross-Winding technology, which is being used for the first time in this series of rods.

## Sportiness and professionalism in CARBON FIBRE and zylon

“Unbreakable” under normal conditions, this rod combines all the elements which go to make a professional carp rod: super-slim blank; extreme lightness; fast, controlled action; and a progressive deployment of power, which ends every twist with success. And, of course, the rod fittings meet the high demands made upon every SPORTEX product.

Extra large original SIC rings, # 50 start ring, original FUJI reel seat, sectioned Duplon handle with metal closure cap.

For every occasion the ideal rod: 12' from 2.50 lb to 3 lb and 13' 3.75 lb.

Guide sizes  
Carp Z 2.5 - 2.75 - 3

Guide sizes  
Carp Z 3.75

**Original SIC guides**  
with high abrasion resistance and maximum heat dissipation.

This is the first time ever that the revolutionary *Helical Core Cross-Winding* has been used in conjunction with zylon fibres.

The rod blank consists of five special layers of carbon fibres and zylon laid in a single direction. The core is formed from an HM carbon fibre, which provides the basis for the special speed and strength of the “Z”. Using a new process developed by us, the penultimate layer of carbon fibre is arranged above the zylon and runs counter to it, with the result that a unique helix structure is created which provides the rod with perfect casting characteristics.

- Longer casts thanks to a five-fold blank structure
- Perceptibly increased accuracy thanks to *Helical Core Cross-Winding*
- Improved speed and optimised reset behaviour thanks to a HM carbon fibre core and zylon

Our designers are delighted with this new rod. Why not try out the advantages of this high-tech carp rod for yourself – you’ll soon be persuaded too.

10 YEAR

*Helical Core Cross-Winding*

# SPORTEX Carp rods

## SPECIMEN CARP II

### The best SPORTEX traditions in perfect harmony

This new series of rods in a modern design is the result of SPORTEX's own *HT-Cross-Winding* process. This makes casts of supreme distance possible, precisely on target, while the sensitive action is retained during fantastic twists. The Specimen Carp II has an optimum semi-parabolic carp action, a strong spine, and high stand-up capacity. It reflects the trend towards perceptibly slimmer and lighter rods, with no compromise when it comes to performance capacity and security. Ringing is provided by 100% SIC rings for optimum heat dispersion. FUJI reel holder.

### Design formats:

length 12', 13'

### Casting weights:

2.75 lb, 3 lb, 3.50 lb

## COMPETITION CARP

### English feeling with SPORTEX perfection

Our Competition Carp shows that a light, slim, high performance rod doesn't have to cost the earth. The rod is perfect for the carp angler who doesn't just want to cast long distances, but also demands a rod that will set the hook safely no matter the distance and allow the angler to enjoy the fight. The Competition Carp provides a lot of enjoyment and it will look really good on your rod pod, too.

A 12' rod with 2.75 lb, 3 lb, 3.25 lb, 3.5 lb and a 13' with 3.5 lb

## COMPETITION SPOD

With the Competition Spod, you simply cast your spods further into the horizon. Distances over 160 yds are possible.

A 13' rod with real 5.5 lb!

## Carbon landing net poles

### One piece, telescopic and unbreakable

The new type of telescopic landing net poles developed by SPORTEX perfectly combines two functions. Extended to 1.80 m it is ideal as a landing net pole to be used from the bank. The highlight is the new adjustment system: when landing, or on the boat the landing net pole can be telescoped together and the "long end" is therefore no longer in the way.

The 180b cm one-piece landing pole has become legendary. Based on the handle of a Brilliant Carp rod, it is also irreplaceable for the Boilie shovel as a throwing stick. Due to the English screw fitting at the head, a landing net can be easily fitted.

**Expert advice:**

**Try one size smaller!**

When spin fishing for big catfish, most fishermen think in terms of extra-large lures the size of shoe horns. Of course these big lures do catch fish, but statistics show that more catfish are actually caught with smaller lures between 9 and 15 cm in length, whether it's spoons or soft lures. Colder waters require smaller lures.

# Catfish rods – at home in every hot spot

They can't be forced and they can't be taken by surprise. In truth, even the best is only just good enough for the largest of our freshwater fish. Thanks to innovative *AT-Cross Winding* blank technology, which brings together strength and action into an unbeatable combination, our catfish rods are unique on the market. There's no lifeless thrashing about, Instead you have active special rods, with actions perfectly matched for use as spin buoys or boat rods. With a SPORTEX catfish rod, you are holding decades of experience in the production of agile rods for large fish plus the practical experience of our catfish team.

# SPORTEX TEAM WALLER

## TEAM WALLER SPIN

### **Slim, extremely powerful and fast to react**

These indomitable rods are hardly heavier than a sturdy pike rod. Due to the semi-parabolic action and the powerful handle you can pit your whole bodyweight against the fish, without fearing a break. The high-quality SIC guides in triangle design are extremely smooth, abrasion-resistant and dissipate heat.

### **Design formats:**

length 275 cm, 300 cm and 320 cm

### **Casting weight:**

200 g

## TEAM WALLER BOAT

### **The specialist rod for a guaranteed catch**

With a length of 275 cm and 300 cm these rods with their flexible, powerful tips are perfectly designed for playing the fish close to or directly under the boat. It is precisely here that the correct rod action is important, as many rods simply just buckle under and hours of senseless pumping begin. Both SPORTEX boat rods, in contrast, work actively against this at every stage, so that the pumping actually arrives at the catfish.

### **Design formats:**

length 275 cm and 305 cm

### **Casting weight:**

400 g

## TEAM WALLER BOJE

### **The classic stand-up rod**

In length, action and casting weight it is exactly tailored to the demands of angling with buoys and pellets-riggings. When it is about not letting the catfish pull back a single meter, with closed reel brakes, after taking a bite, then a maximum amount of power is needed. This rod, with its enormous energy reserves, delivers this power into the water without loss and is rarely overstrained. The advantages of the *HT-Cross Winding Technology* are brought fully to bear.

### **Design formats:**

length 330 cm

### **Casting weight:**

400 g

## TEAM WALLER MAGNUS CATFISH

### **The Secret Weapon**

The Magnus Catfish sea fishing rod has already been in use for a few years for catfish on the River Po. The powerful yet still somewhat softer action gives the rod a special flexural capacity. Thanks to the shortness of the Magnus, it functions like a vertical rod for catfish. We have now adapted the grip concept to the special requirements of catfish enthusiasts, and the rod will bring any catfish to the surface.

One version is all it takes: 2.10 m and 30 lb – it's the power lifter for every catfish.

10 YEAR  
BLANK GUARANTEE

## SPORTEX TEAM WALLER FUN

### Team Waller Fun

Der Weg zum Erfolg

Nahezu unzerbrechlich und unverwechselbar im Design sind diese kraftvollen Waller-spezialisten „Angelspaß“ pur – mit höchster SPORTEX-Technologie vom Feinsten.

Die Blanks aus einem speziell von uns entwickelten Kohlefaser-Gewebe verleihen diesen Ruten eine besondere Progressivität von der Spitze bis zum Handteil. Eine Kraft, der kein Waller gewachsen ist.

### TEAM WALLER FUN SPIN

In Aktion und Leichtigkeit für das Spinnfischen mit schweren Kunstködern wie Blinker, Shads und Wobbler entwickelt. Mit ihrer Spezialaktion und dem gesamten Aufbau mit ergonomischem Griff und Original SIC-Ringen entsprechen sie bester SPORTEX-Spinnrutentradition.

#### Ausführungen:

2-teilig, Längen: 280 bis 330 cm

#### Wurfgewichte:

100 bis 400 Gramm

### TEAM WALLER FUN DRIFT

Mit dieser Rute haben wir für das Driftangeln vom Boot eine absolute Spezialrute konzipiert, die genau den Anforderungen kontrollierter Führung der Montage, durchdringendem Antrieb und kraftvoll forciertem Drill im Nahbereich oder unter dem Boot entspricht.

#### Ausführungen:

Zweiteilig, Längen: 275 bis 320 cm

### TEAM WALLER FUN BOJE

Als spezialisierte Stand Up-Rute ist die Kraft dieser Rute „gnadenlos“. Selbst am unwegsamen Ufer, mit blockierter Bremse, haben Sie Ihren Kapitalen voll im Griff. Sie arbeitet im Drill aktiv bis ins Handteil, so dass Sie Ihre ganze Kraft dem Fisch entgegensetzen können.

#### Ausführungen:

2-teilig, Länge: 330 cm

#### Wurfgewicht:

300 Gramm

# SPORTEX TEAM WALLER FUN

## Team Waller Fun

### Specialists in success

Almost unbreakable, and unmistakable

in design, these powerful catfish specialist

rods are "fishing fun", pure and simple, with

SPORTEX technology at its finest. The blanks

are made from a high-density fibreglass/

carbon fibre mixed fabric material especially

developed by us, which gives these rods

a special degree of progressiveness from

the tip to the hand section. It's the kind of

strength that no catfish can beat.

### TEAM WALLER FUN SPIN

Developed with full regard to action and lightness for spin fishing with heavy artificial baits such as blinkers, shads and wobblers. With their special action and their overall structure with ergonomic handle and original SIC rings, these really live up to the traditions set by the best SPORTEX spinning rods.

**Design formats:**  
length 280 cm

**Casting weight:**  
200 g

### TEAM WALLER FUN DRIFT

With this rod we have come up with an absolute speciality in drift fishing, which precisely meets the needs of controlled guidance in setting up, penetrating strike and powerful forced twist in the area close to or under the boat.

**Design formats:**  
length 305 cm

**Casting weight:**  
400 g

### TEAM WALLER FUN BOJE

As a specialised stand-up rod, this is a mercilessly strong creation. Even on impassable banks, with locked brake, you have your biggest resource firmly in your grip. By actively working when twisting, right into the hand section, it means you can pit the whole of your strength against the fish.

Rainer Korn, editor in Chief "Kutter & Küste" magazine. Fish caught with Jolokia Jigging 150g.

# Sea rods – The power to bring everything to the surface

Supreme power in widely differing situations, sustained toughness, and blanks and components matched to each other in every respect – all factors which put SPORTEX sea rods in a class of their own. Whether you are trolling, drifting or surf fishing, when it comes to action and design every sea rod from SPORTEX is matched precisely to its use. It is incredible what strength, security and agility can be packed into these slim rods. On the one hand, they provide more sensitivity for the bait, and, like a spinning rod, allow for hours of fatigue-free use even in the harshest weather conditions. On the other, everything is designed to deal with the extreme demands of sea fishing, from the top quality paint finish, through to the robust rings, powerful reel holders and ergonomic hand sections.

### Expert advice:

During spring time soft baits (Shads, Twister) are my first choice to catch halibut. These active predators chase partly in extremely shallow waters. Their preferred prey: lumpfish and common shore crabs.

The best bait colors are accordingly: dark-green, brown-orange and motoroil for crabs as well as blue-silver. Pink and brown-red-gold for lumpfish. In late summer, bait fish, especially pollack and haddock, are a real winner on halibut. Don't spare on sizes: A pollack of 40cm size is exactly right.

Rainer Korn, editor in Chief "Kutter & Küste" magazine, Germany

# SPORTEX Sea rods

## SEASTAR

The perfect combination of performance and quality: these sea rods are designed to be constant companions on journeys and reliable partners on trawler vessels. The high demands of sea fishing set the standard for their performance. And the upgraded Seastar Travel is now also available in a new design, which will absolutely delight you. Pure pleasure in sea fishing – that's exactly what you can expect with both these series of rods.

10 YEAR  
BLANK GUARANTEE

## JOLOKIA

This new series of rods owes its name, Jolokia, to the spiciest chili bean in the world. A striking, aristocratic design, perfect craftsmanship and sharp twists – all this awaits you with the JOLOKIA sea rods, a series seemingly one step ahead of the future.

### SEASTAR Travel

With just 60 cm transport length this 5-piece travel rod is ideal for trips abroad. Both rods are ideal for fishing trips abroad and at home with a total length of 270 cm and a casting weight of 80 g to 100 g and 90 g to 160 g for fishing large fish on all seas or at home for zander, pike and cod.

### SEASTAR Trolling

This new range of light-weight trolling rods has been designed to be fished with downriggers, side-planers or indeed without any trolling aids. Even though we've utilised top quality carbon in the rod tip, it is remarkably flexible. But the really special thing about this rod is the progressive action. The power develops steadily from the butt to the tip without the rod tip becoming unstable. If you are trolling deep for big salmon, giant cod or ferox trout, then this is the rod to have with you.

**Design formats:**  
length 180, 240, 270 cm

**Casting weights:**  
15 - 20 lb

### JOLOKIA Jigging

Modern rubber baits or lures for sea fishing are frequently very actively guided. A rapid upwards pull in short bursts is what is called for here rather than the traditional type of playing on the lure. The Jolokia Jigging offers exactly the right action for this. Somewhat softer at the tip, but with an enormous backbone, it provides active support for you in guiding the bait, and provides the power needed to counter even the strongest halibut pull.

### JOLOKIA Pilk

**Top for performance, quality and fun**

Lightweight to handle and mercilessly powerful in the twist, these rods are specially designed for tackling cod, ling and their counterparts. As with all SPORTEX sea rods, the Jolokia Pilk is designed to be tough and for dealing with the unique challenges of salt water. The blank, made using optimised HM/IM carbon fibre technology, is formed from top-quality SIC rings, temperature-neutral, weather-resistant premium EVA and a sophisticated reel holder fully resistant to salt water.

Whether fishing from a cutter, a boat, or from the jetty, JOLOKIA rods are the perfect companion.

**Design formats:**  
length 270 and 300 cm

**Casting weights:**  
90 - 150 g, 150 - 250 g

### JOLOKIA Boat

**A power pusher with a fiery design, with the emphasis on action**

Whether it's cod, ling, shark or halibut, this series of boat rods has the precise weight class for you. Hard at the strike, but not, as is usually the case, 'stiff as a broomstick', these rods made of HM/IM carbon fibres work with you completely thanks to their superb action. Slim, light and with striking good looks, they are a highlight on every cutter. And, of course, the fittings are fully resistant to salt water.

**Design formats:**

2-section, length 210 and 240 cm

**Casting weights:**

20, 30 and 50 lbs

Two versions for two typical situations: The 2.10 m version with 30 lb and 50 lb for normal depth up to 100 m and little drift and the 2.40 m version with 30 lb and 50 lb for deeper waters with more drift and undercurrent.

# SPORTEX Sea rods

## High class sea rods for discerning anglers

All of our Magnus series rods are categorically designed to fulfil the requirements of the modern sea angler. If you are looking for the perfect rod for fishing Norwegian or Icelandic waters, then you'll find it here. The blanks are of particularly robust construction, but certainly not clumsy or heavy. They are in every respect real power houses and have hard-wearing components resistant to the rigors of a life at sea. If you choose a SPORTEX Magnus or Black Ocean rod you can be sure you are making the right choice. The next pollack, cod or halibut is waiting for you... High quality rods for the discerning angler.

### MAGNUS BOAT

#### The next generation of sea rods for superior fishing

These rods were purely made to bear all challenges of modern sea fishing. We have improved their sensibility for better bait control and could meliorate their spine and action for precise casting and unfailing landing of big fish. All components, such as first-class lacquering, robust guides, powerful reel seats and ergonomic, resilient handles, are designed to pass roughest saltwater conditions.

**Design formats:**  
length 215 cm

**Casting weights:**  
20 lb, 30 lb or 50 lb

### MAGNUS JIGGING

With their fast tips and smart, fast action, these rods are ideal for sensitive jigging from a cutter or from the coast. With a length of 185 cm, they provide secure handling even in a fully occupied cutter. The superb reserves of power in the blank means they can react to any surprises, whether large cod or flounder. The perfect rods for large and small bodies of water.

The structure of the slim and extraordinarily light-weight blanks of our feeder and picker rods, in optimised HM carbon fibre technology, with top quality Fuji-SIC rings and light, highly functional reel holders, makes them masterpieces of craftsmanship. Every one of the full carbon-fibre tips is fitted with somewhat larger SIC rings, which allow for an unimpeded line run for wide casts.

**Design formats:**  
length 185 cm

**Casting weights:**  
150, 220 and 280 g

Magnus Surf SU4219 – original Fuji SIC Lowrider guides

Magnus Boat – Nylon butt cap with gimmel and protective cap

10 YEAR  
BLANK GUARANTEE

### MAGNUS INLINER

#### The perfect combination of strength, action and comfort

Guide-less fun and a fantastic action, which, according to our Norwegian test fishermen, they know from no other rod. With this new generation of inliners we have eradicated the disadvantages of normal guide-less rods. Through an innovative, continuous guidance system integrated in the blank, the line leads along the whole length of the blank without interrupting the action curve. With these SPORTEX inliners there are no clattering from loose ring insets or grinding of the line inside the blank, as with other inliners. The continuous line guidance system with SIC is integrated into the carbon. The open line lead guide makes the threading of the line easier. These rods of course have the HT-Cross Winding-Technology for more controlled strength, typical for SPORTEX.

**Design formats:**  
length 240, 270 cm

**Casting weights:**  
30 lb, 50 lb, 150 to 250 g

### MAGNUS SURF

#### A great tradition – the rod for the beach pro

Beach rods are part of the SPORTEX tradition. Our completely new range of high performance beach rods have been tested, strengthened and refined over a period of 12 months. According to our test anglers, the resulting products are a dream come true! A combination of our *HT-Cross Winding* process and HM carbon fibres have resulted in a stiff but incredibly light rod that weighs less than 500g. The three pieces are connected with "point to point" rod connections that are specially coated to ease assembly. The high-end version with FUJI rings also has an optional softer solid carbon fibre tip section that is ideal for scratching behind the surf line for flatties. This is a true casting machine.

# SPORTEX Coarse rods

10 YEAR  
BLANK GUARANTEE

## EXCLUSIVE TROUT

Fine and light still water and Spirolino rods with not too-hard, but active tips. These rods are designed for use with medium-weight floats and Spirolinos. Due to the fast action setting the hook impacts directly to the fish. For this reason, the Exclusive Trout is gladly used by Hegenen fishermen, in order to fish from the bank with large floats.

**Design formats:**  
length 310, 365 and 395 cm

**Casting weight:**  
30 g

## EXCLUSIVE MATCH

These exclusive and extremely light match rods in 3 parts for professional float and waggler fishing have a slim, very well-balanced blank with high resilience and a very fast, yet fine, tip. The rod construction with excellent SIC match guides effectively prevents the wet line sticking when casting with light waggles. The extended rear handle made from premium AAA cork allows tireless angling for many hours.

**Design formats:**  
length 390 and 420 cm

**Casting weight:**  
8 - 16 g

## EXCLUSIVE FLOAT

The forerunner of this remarkable series of rods was the legendary Exclusive Trout. Decades of experience, and the utilization of the most modern carbon technology, have resulted in our design team coming up with an exceptional model, the Exclusive Float. Much more than a classic match or float rod it is perfect as a heavy float rod for carp fishing, for float fishing dead baits, or even for deep water nymph fishing. All this in a remarkably light weight rod.

**Design formats:**  
length 365, 395 and 425 cm

**Casting weight:**  
20 - 40 g

## HEGENE

Light, specialised rod for Hegenen fishing. The slim, light blank signals precisely even very cautious bites. This extremely light rod made from HM/IM carbon, is perfectly balanced and fitted with ultra-light SIC guides. The solid cork grip with sliding reel seat allows the mounting of nottingham reels and spinning reels. The sliding hoods are made from nylon and are minimally elastic to allow the secure mounting of the reel. The weight of the rod is extremely light at only 60 grammes.

**Design formats:**  
length 240 cm

## Power lifting rod

Telescopic lifting rod, made from extremely durable glass fibre. Every landing net with common screw fittings can be fixed to the solid brass head.

### Design formats:

Length: 185 cm. Telescopically extendable to 230 cm  
Length 185 cm. Telescopically extendable to 340 cm  
Extension part 180 cm

# SPORTEX Feederruten

## Feederruten der nächsten Generation

Der Aufbau der schlanken, außergewöhnlich leichten Blanks unserer Feeder- und Pickeruten in optimierter HM-Kohlefasertechnologie, mit hochwertigen SIC-Ringen und leichten, funktionellen FUJI-Rollenhaltern machen sie zu handwerklichen Meisterstücken made by SPORTEX. Jede der Vollkohlefaser- und Vollglasspitzen ist mit etwas größeren SIC-Ringen als üblich ausgestattet, die einen ungehinderten Schnurdurchlauf auch mit Stopper für weite Würfe erlauben.

# SPORTEX Feeder rods

10 YEAR  
BLANK GUARANTEE

The perfect Feeder and Coarse rods for large and small waters.

Light, slim and with a unique design, our new Feeder and Picker rods belong to the standard equipment of every ambitious angler. These rods, made from optimized HM/IM carbon fibre technology, are fast in reaction and highly specialized to support the slightest bite indication of the Picker- and Swing-tips. Powerful, yet perfectly balanced, they are perfect for all kind of coarse fish – from little roach to bream, tench or even a larger carp.

## MEDIUM FEEDER

Universal for still and flowing waters

This feeder rod series covers all areas of classic coarse fishing in both still and flowing waters. High-quality SIC guides on a slim blank allow for unhindered letting out of line for long casts. Very fast and with powerful reactive ability you can effortlessly reel in large barbel in a current. All Medium Feeder rods are equipped with 3 solid carbon fibre tips (1, 1.5 and 2.0 oz.).

**Design formats:**  
length 350, 390 and 420 cm

**Casting weight:**  
80 - 140 g

## HEAVY FEEDER

Powerful for long casts and strong currents

High-quality, very powerful feeder rods, designed for a casting weight of up to 200 grammes. For long casts with large cage feeders and for controlled fishing in strong currents. Despite its powerful construction with high-quality HM/IM carbon material, this rod sits light in the hand. The SPORTEX Heavy Feeder comes with 3 solid carbon fibre tips (2, 2.5 and 3.0 oz.).

**Design formats:**  
length 390 and 420 cm

**Casting weight:**  
150 - 200 g

## X-HEAVY FEEDER

Incredibly powerful and tough, yet still slim and light,

this feeder rod will be your reliable companion on fast-flowing rivers or lakes where extremely wide casts are called for. The blank structure in HM/IM carbon fibre, original SIC rings, and FUJI reel holders is powerful in the cast, fast in action, and gives progressive power deployment in the twist. The SPORTEX Heavy Feeder comes with 3 solid carbon fibre tips (2.5, 3 and 3.5 oz.).

**Design formats:**  
length 390 cm, 420 cm

**Casting weight:**  
170 - 240 g

## MULTIPICKER

All-purpose due to 2 complete tip sections including 2 Winkel-picker tips and a swing tip with a common handle section.

Anglers who have devoted themselves to fishing with swing tip and winkle pickers will be thrilled by this rod concept. The Multipicker can be used for both types of angling. The special feature about these Multipickers are the 2 complete tips and the common handle section, which, depending on the tip section, provides easy bite indication.

# SPORTEX Fly rods

## The legend lives!

With the new version of the Diamond Fly, we have achieved something really special. Slim, featherlight, perfectly finished and wonderful to look at, these rods actually conceal their real value deep inside – within their extraordinary blank. It is not the action that binds the rods together, nor even the technology – it is their perfection! The individual design and choice of material means that every individual blank has been gifted with its own unique and unmistakable character. What pike fisherman wouldn't want a rod whose blank provides the sensitive nature of a grayling rod, or performs perfect rolling casts? What stream fishing enthusiast wouldn't want a tough blank which protects against coastal winds or can lift more than 15 metres of line out of the water in one pull?

The extremely lightweight class 3 stream rod from the SPORTEX Diamond Fly series presents the smallest dry flies as gently as a feather, and is just long enough to allow awkward nymphs to be spun through the rapids of wild rushing streams with an outstretched arm.

The class 4 Diamond Fly was designed with the demanding grayling fisher in mind; the slim blank is calm and smooth, giving easy and harmonious casting. When lifting, the tip immediately passes on a gentle tug on the hook, with the result that it sets rapidly and securely in the soft mouth of the grayling. The parabolic blank then ensures that the drill-like impacts of the typical grayling attempt at escape can be securely cushioned.

The class 5 model, in 9 ft format, can truly be described as a well-balanced all-rounder. Even less practised fly fishers become hugely enthusiastic about the compliant blank. They cast narrower loops and bring their flies on target with more precision and fewer empty casts.

In class 6, a perceptibly more dynamic spirit in the blank comes into effect, which transforms powerful double pulls into clean, precise casts with streamers or heavy nymphs – ideal for fishing for large trout or barbel.

Thanks to the extremely high-quality materials and a very clever design, the blanks in classes 7 and 8 are the absolute lightweights in their category, and are unbelievably fast and powerful in pulling through. Large pike streamers are rapidly brought to distance with few empty casts, and can be lifted from the surface of the water again with no effort at all, together with the line. Both rods are completely saltwaterproof, and perform at their best under the roughest conditions – free of fatigue and with absolute performance.
